

COMMUNITY ENGAGEMENT SNAPSHOT

Please review the previous community engagement snapshot for the project background on Collaborate Canada Bay.

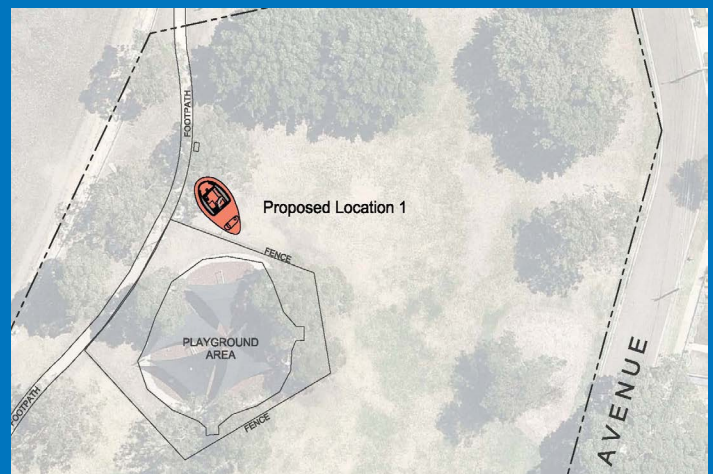

CONSULTATION SUMMARY

Community consultation undertaken in May-June 2020 found that a non-automated toilet was preferred by the community. As non-automated toilets come with different design considerations and requirements, reassessment of the site was undertaken by the project team and two locations were determined to be most suitable for the facility. Both locations were posed to the community for feedback. Council also asked for feedback on concept designs.

With 41 submissions received, the community showed an equal preference for both location 1 and location 2. This feedback was reflected amongst both perimeter residents and residents in the wider community. Minor feedback was also received on the concept design. In preparation for lodging a DA, an independent town planner was engaged to provide a final recommendation for the most appropriate location. The town planner recommended location 1, north of the children's playground. Several factors were considered in this assessment including safety outcomes, underground services, accessibility and coastal ecology. Their report can be found on Collaborate Canada Bay.

LOCATION 1 BENEFITS

- Safer and more accessible for children and families
- Situated next to another built structure
- Close to existing services including sewerage line
- Accessibility of the toilet from playground and pedestrian footpath
- Distance from coastal wetlands

DESIGN FEEDBACK

- Free form, sculptural
- Like outdoor hand washing area
- Timber cladding will soften the bulk and form
- Roof angle is harsh
- Concerns about potential vandalism
- Needs to be more inconspicuous and sympathetic to the environment around it
- Outdoor change area could be bigger

WHAT HAPPENS NEXT?

Community feedback received on the concept design will be used to inform the preparation of a detailed design. A Development Application (DA) will then be submitted Council and notified to nearby landowners and residents. Any submissions received in response to the notification of the DA will be considered. The application will be reviewed by an independent planner and determined by the Canada Bay Local Planning Panel.
