

# All About FOGO

## What is it?

Food Organics and Garden Organics (FOGO) is a waste service that collects food and garden waste together.

## Why are we offering a FOGO service?

- 1 The NSW EPA has mandated that Councils provide a FOGO service to all households by 2030.**  
Council would like to trial the service at a smaller scale to create a suitable city-wide rollout plan to ensure a smooth transition for everyone.
- 2 34% of Canada Bay's general waste is food waste.**  
Redirecting food waste into the FOGO bin can divert organic waste from landfills, which can reduce greenhouse gas emissions.

## What happens to FOGO waste?

Your FOGO waste gets processed into compost, and the end product is tested for quality before being sold.

# What can go into the FOGO bin?

Meat scraps, bones and leftovers

Fruit and vegetable scraps

Eggs and dairy products

Garden waste

## Handy tips

Keep your kitchen caddy away from direct sunlight.

Wash your kitchen caddy regularly with soapy water.

You do not need to use a bin liner.

Sprinkle bi-carb soda on the bottom of your caddy to keep it dry and free of odours.

Freeze or keep smelly food scraps in the fridge until just before you plan to empty your caddy.

Food packaging and takeaway containers

Pet waste and cat litter

Plastic bags and plastic film

Shredded paper and cardboard

Tea bags

# How does FOGO work?

1

Line your kitchen caddy with a certified compostable bin liner.

2

Separate your food waste into the kitchen caddy.

3

Depending on your building, dispose of your food waste (every 2-3 days) into:

The large green-lidded wheelie bin.

Small FOGO bin located on your level.

4

Rinse and re-line your kitchen caddy to use again.

5

FOGO waste bins are collected weekly.

6

Run out of liners? Ask your Building Manager if they have any to distribute or scan the QR code below to request more.
